

Let our science support your work of art

PureSpray™ FX is an emulsifiable horticultural spray oil that suppresses powdery mildew and spider mites and deters feeding by aphids on cannabis. It's formulated with a 99% pure, crystal-clear mineral oil that leaves virtually no aromatics or impurities behind in the oil. Based on 20+ years of experience in agriculture, our product formulation helps Canada's cannabis growers protect the health of their crop. Registered for use on cannabis grown commercially indoors in Canada, PureSpray FX is compliant with the National Standard of Canada on Organic Production Systems.

Harvest

• Water applied on Days 62, 69, 77, 89, 100, 107, 114 and 121

• PureSpray FX and potassium bicarbonate applied on Days 62, 77, 100, 107, 114 and 121

The PureSpray FX difference

- Colourless and odourless
- Controlled manufacturing process from start to finish for consistent product quality
- 20+ years of proven efficacy
- No known resistance
- Canadian-made for Canadian growers
Approved for licensed commercial use exclusively on cannabis, ONLY in Canada
- Permitted for use with Canadian organic production systems (CAN/CGSB-32.11-2015)

Best practices

Spray Interval: PureSpray FX should be applied on a 7-14 day schedule with a maximum of 6 applications during the life span of the plant (life span is 12-14 weeks from cutting to harvest).

Application Rate: Thorough coverage is essential. Use 5 litres of PureSpray FX in 250-500 litres of water (1-2% solution). Use sufficient spray volume, 1,000-3,000 litres per hectare.

Spray Timing: For powdery mildew, begin applications when conditions are favourable for disease. Do not apply on seedlings or clones less than 2 weeks old without having determined sensitivity (phytotoxicity).
